

# ThermaPANEL Process

This is a brief, 5-step, walk through of the average process from contacting Therma-HEXX all the way until installation.

## The Brief

Client relays their wants and needs and it is determined by both parties if ThermaPANEL is right for them.

STEP  
01

## The Research

Customer provides architectural plans for evaluation and initial pricing

STEP  
02

## The Ideation

Our team gathers all relevant materials for the project and provides a design so clients can visualize the system at work and receive ROI analysis and cost savings.

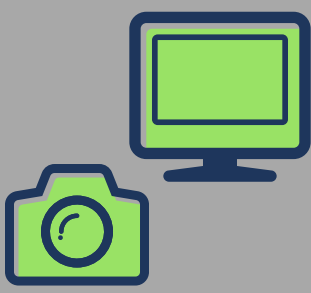

STEP  
03

## Finalize Design

Complete project specific ThermaPANEL layout showing how panels, manifolds and tubes fit into specified area. This includes piping schematic in the mechanical room,

STEP  
04

## Production and Delivery

We assemble the system, ship to location, do on-site installation training, and ThermaPANEL will be up and running.
